

ASEAN Wildlife Forensics Seminar

Bangkok, Thailand, July 4-5th 2012

Hosted by the Department of National Parks, Thailand

This two-day seminar is being organized by the ASEAN Wildlife Forensics Network to showcase the use of forensic analysis in the investigation of wildlife crime.

Confirmed international speakers:

- Dr Lucy Webster, Lead Scientist, Wildlife Forensic Laboratory, UK
- Trey Knott, NOAA Marine Forensic Laboratory, USA
- Guy Shorrocks, Lead Investigator, RSPB, UK
- Dr Rob Ogden, Director, TRACE Wildlife Forensics Network, UK

From the identification of species for CITES enforcement, to the investigation of captive breeding claims, the seminar will present work from around the ASEAN region and beyond, demonstrating how forensics is now being used to support wildlife crime investigations.

Event outline:

Opening Ceremony	VIPs from Thailand, Malaysia and the British High Commission
Session 1	Wildlife Forensics in the ASEAN region
Session 2	International approaches to wildlife forensic investigations
Session 3	The ASEAN Wildlife Forensic Network
Session 4	Host country experiences: Thailand and Malaysia
Session 5	Regional perspectives: Indonesia and Vietnam
Session 6	Future directions for the ASEAN Wildlife Forensics Network

Audience:

The organizers would like to invite policy-makers, enforcement officers and scientists working in wildlife crime investigation to attend.

Registration:
